

Simple cost effective line stringing by 1kg fixed wing remote piloted aeroplane

Low 2.6 watt hour battery pack this simple 1kg Powerliner can string 500 metres 90 kg shark line

1.6km was the longest of the eleven spans flown for Dartmouth to Mt Beauty power station project featured in SEC documentary Tower 67. (circa 1977)

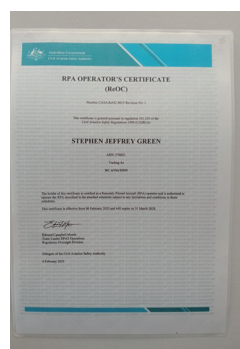

During the 1990s, well before drone licensing was on the radar, this service flew a number of successful missions for PowerCor in the Otways and Bendigo regions

Click the You Tube logo for a short video explanation as to how it works
